GREGORY PHILLIPS

Cloud Engineer

07920 056363 | greg@gwphillips.co.uk | linkedin.com/in/gregwphillips
github.com/gregp1985 | Surrey, UK | Seeking Cloud Engineer roles in Dubai, UAE

SUMMARY

AWS Certified Solutions Architect with over 10 years of prior IT experience, progressing from first-line support into senior infrastructure engineering, technical leadership and international enterprise infrastructure roles. Strong background in Windows Server, Active Directory, virtualisation, networking, firewalls, VPNs, data centres and Microsoft 365 migrations. After building and running an independent electrical contracting business, returned focus to technology through a Diploma in Full Stack Software Development, AWS certification and hands-on cloud projects. Strongest AWS areas include EC2, VPC, IAM, Route 53, S3 and cloud networking, with developing Terraform capability and working knowledge of AWS CloudFormation.

CAREER FOCUS

Seeking Cloud Engineer roles in Dubai, UAE, bringing substantial prior infrastructure experience together with current AWS certification, software-development training and hands-on cloud project work.

TECHNICAL PROJECTS

GWPInvest - AWS Quantitative Research & Trading Platform

Private Technical Project

Current | AWS · Python · Linux · Machine Learning

- Designed, developed and operate a Python-based quantitative research and paper-trading platform running continuously on AWS; proprietary strategy and model source code remain private.
- Operate separate EC2 environments for research/model development and continuous paper-trading workloads, administering Ubuntu Linux, Python environments, dependencies and long-running processes.
- Built data-processing pipelines ingesting external market data across hundreds of cryptocurrency markets and performing machine-learning inference against continuously updated datasets.
- Implemented structured logging and persistent research/trading outputs for analysis and extended validation; manage source control and deployment workflows using Git/GitHub and SSH.

Cherry Leaves Mildew Detection

Public GitHub Project

2026 | Python · TensorFlow/Keras · Streamlit

- Developed and deployed an image-classification application using Python and TensorFlow/Keras to detect powdery mildew in cherry leaves.
- Built the data-processing, CNN training and prediction workflow and an interactive Streamlit interface, achieving approximately 99% test accuracy.

Gregory's Bistro - Restaurant Booking Application

Public GitHub Project

Python · Django · PostgreSQL · JavaScript · Bootstrap · Heroku

- Built and deployed a full-stack restaurant website with authenticated customer, staff and administrator workflows for creating, editing, cancelling and managing table reservations.
- Implemented dynamic availability, opening-hours validation, automatic allocation of the smallest suitable table and PostgreSQL constraints to prevent overlapping bookings.
- Added email verification, role-based access, automated Django tests and responsive Bootstrap interfaces; deployed to Heroku with PostgreSQL and Cloudinary.

KEY ACHIEVEMENTS

AWS Certified Solutions Architect

Associate (SAA-C03), supported by extensive hands-on labs and practical AWS work.

Full Stack Development

Completed a year-long Diploma in Full Stack Software Development with Code Institute.

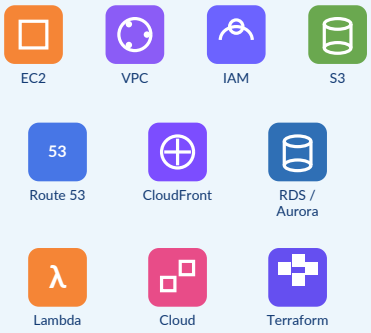

10+ Years Infrastructure

Progressed from first-line support to senior infrastructure engineering and technical leadership across MSP, enterprise and international environments.

Business Owner

Founded and successfully operate an electrical contracting business, managing projects, compliance, customers and business operations.

AWS & CLOUD STRENGTHS

CERTIFICATIONS

AWS Certified Solutions Architect - Associate
Amazon Web Services
Issued: 2026

Microsoft
MCSE 2003 | MCSA 2008

A+

GREGORY PHILLIPS

CLOUD ENGINEER

PROFESSIONAL EXPERIENCE

Self-Employed Electrician / Business Owner
Independent Electrical Contracting Business
2016 - Present | Surrey, UK

- Built and operate an independent electrical contracting business after completing Level 3 electrical qualifications, progressing to full residential rewires, renovation projects and selected commercial installations.
- Manage projects end-to-end from assessment and quotation through installation, testing, regulatory compliance and customer handover.
- Maintain NAPIT registration and current 18th Edition knowledge; manage the business website and Microsoft 365 email environment.

Infrastructure & Senior Technical Support Engineer
Wates Group
2015 - 2016 | UK

- Senior infrastructure role focused on Windows Server, Active Directory and domain security, VMware and Hyper-V across a national enterprise estate.
- Managed virtual server infrastructure and supported enterprise firewalls, networking, Meraki wireless/security and data-centre infrastructure.
- Played a key technical role in the migration of company email services to Microsoft Office 365 and provided third-line infrastructure troubleshooting.

Career break: 7 months of international travel before joining Wates.

Infrastructure Engineer - EMEA & Asia
The Travel Corporation
2014 - 2015 | EMEA & Asia

- Maintained infrastructure across more than 25 travel and holiday businesses with varied environments across EMEA and Asia.
- Managed VMware, Citrix, networking, firewalls and VPNs; supported server virtualisation, firewall upgrades and Office 365 migrations.
- Travelled to Shanghai during a major network and infrastructure upgrade to test and confirm stability and support the migration of systems.

Senior Infrastructure Engineer / Service Desk Manager
Tegen
2012 - 2014 | UK

- Delivered senior infrastructure engineering within an outsourced IT provider supporting multiple customer organisations, including customer sites and Tegen's private hosted cloud and data-centre environment.
- Delivered infrastructure, service and database migration projects and regular infrastructure/security reviews.
- Managed a five-person service desk while retaining senior engineering, escalation and project responsibilities.

Project Technical Lead
Phoenix IT Services
2010 - 2011 | UK

- Senior technical lead supporting testing and nationwide deployment of Post Office biometric enrolment systems used for passport and driving licence applications.
- Led four technical support engineers and handled complex escalations, system testing, server configuration and technical documentation.

Infrastructure / Technical Support Engineer
Ramsac
Dec 2005 - Jun 2010 | UK

- Progressed from first-line support to third-line infrastructure engineering over 4½ years within an outsourced IT provider.
- Administered Windows Server, Active Directory, networking and firewall environments; delivered server and Microsoft Exchange upgrade/migration projects and customer infrastructure reviews.
- Achieved Microsoft MCSE 2003 and MCSA 2008 while progressing through the organisation.

EDUCATION

Diploma in Full Stack Software Development
Code Institute | 2026
Year-long programme covering Python, Django, JavaScript, relational databases, Git/GitHub, deployment and predictive analytics / machine learning.

A Levels - Mathematics & Computing
Godalming College | 2002 - 2004

TECHNICAL SKILLS

Development
Python · Django · JavaScript · HTML/CSS · Git · GitHub · REST APIs · Linux

Enterprise Infrastructure
Windows Server · Active Directory · Group Policy · VMware · Hyper-V · Citrix · Microsoft 365

Networking
TCP/IP · routing · switching · VLANs · VPNs · DNS · DHCP · firewalls

Data Centre / Platforms
Virtual server infrastructure · hosted environments · infrastructure migrations · third-line troubleshooting

COMPANY EXPERIENCE

MSP / Outsourced IT
Ramsac and Tegen: multi-client infrastructure, migrations, support, security reviews and hosted/data-centre environments.

Enterprise
Wates Group: national enterprise infrastructure, virtualisation, networking, Meraki and Microsoft 365.

International
The Travel Corporation: infrastructure across 25+ travel companies spanning EMEA and Asia.

ADDITIONAL QUALIFICATIONS

Electrical
Level 3 electrical qualifications
18th Edition Wiring Regulations
NAPIT registered
